LIMITATIONS

This report has been prepared by ClearLead Consulting Limited solely for the use of the Client and those parties with whom a warranty agreement has been executed, or with whom an assignment has been agreed. Should any third party wish to use or rely upon the contents of the report, written approval must be sought from ClearLead Consulting Limited; a charge may be levied against such approval.

ClearLead Consulting Limited accepts no responsibility or liability for:

- the consequences of this document being used for any purpose or project other than for which it was commissioned, and
- the use of this document by any third party with whom an agreement has not been executed.

The work undertaken to provide the basis of this report comprised a study of available documented information from a variety of sources (including the Client) and discussions with relevant authorities and other interested parties. The opinions given in this report have been dictated by the finite data on which they are based and are relevant only to the purpose for which the report was commissioned. The information reviewed should not be considered exhaustive and has been accepted in good faith as providing true and representative data pertaining to site conditions. Should additional information become available which may affect the opinions expressed in this report, ClearLead Consulting Limited reserves the right to review such information and, if warranted, to modify the opinions accordingly.

It should be noted that any recommendations identified in this report are based on information provided by the Client and as gathered during the site survey. In some cases access cannot be granted to all areas of the site, in these instances and in the absence of information to the contrary, ClearLead Consulting Limited will use the information provided to complete the report.

Executive Summary

This report presents the findings of Habitats Regulations Assessment (HRA) of the Watford Borough Council Local Plan Final Draft version January 2021.

The Watford Local Plan 2021-2037 sets a vision for Watford up to 2037 and will guide planning decisions and new development. It will set out key issues such as how many jobs are needed in the town and where new housing should be located. The Watford Local Plan sets out sites suitable for development and planning policies that will be used to determine planning applications.

The purpose of an HRA is to assess the significance of potential impacts of a plan on relevant European sites. Natural England has confirmed that the three European sites which need to be considered in this HRA are:

- Burnham Beeches SAC;
- Chiltern Beechwoods SAC; and
- Wormley-Hoddesdonpark Woods SAC.

If Likely Significant Effects (LSEs) on European sites are identified in screening, measures must be put in place to avoid them. Further investigation may be necessary to understand how the plan might affect the integrity of European sites.

The First Draft Local Plan (September 2019) and the Final Draft Local Plan have both been screened. The first draft version of the Local Plan was consulted on between 27 September and 8 November 2019.

The screening of the Final Draft Local Plan identified a LSE in relation to air quality on each of the three European sites considered (listed above) resulting from the following policies: Policy SS1.1 Spatial Strategy; HO3.1 Housing Provision; EM4.1 Providing New Employment; EM4.2 Designated Industrial Areas; EM4.3 Office Development and SA13.1 Allocated Sites for Delivery in combination with growth in neighbouring areas.

The Appropriate Assessment (AA) has assessed potential air quality impacts on each of the three European sites by examining strategic roads that link the plan area with each SAC and reviewing travel patterns of residents of the plan area.

The actual minimum distances travelled via road between the plan area and the European Sites are at least 19.5km. No strategic routes used by residents of the Plan Area were identified within 200m of the SACs. Any contribution to traffic along roads within 200m of the SACs as a result of the Local Plan would be *de minimis*. It is therefore concluded that the Local Plan would not result in an adverse effect on the integrity of the Burnham Beeches SAC, the Chiltern Beechwoods SAC

or the Wormley-Hoddesdonpark Woods SAC either alone or in-combination with growth from neighbouring plans.

The Final Draft version of the Local Plan was consulted on between 18th January 2021 and 1st March 2021. A letter was received from Natural England dated 5th July 2021 in relation to the Final Draft Local Plan HRA Report (January 2021) confirming that Natural England is:

“satisfied that a conclusion by the Local Planning Authority (as competent authority) that there will be no adverse effects on European sites would be appropriate, and therefore advise that further Habitats Regulations Assessment is not required”.

Modifications to the Final Draft Local Plan have been proposed by WBC following Examination hearings in January / February 2022. The modifications have been screened and no LSEs have been identified. Therefore the conclusions of the HRA remain the same: the Watford Local Plan will not result in any adverse effects on European site both alone and in combination.

1 Introduction

ClearLead Consulting has been instructed to undertake a Habitats Regulations Assessment (HRA) of the new Watford Local Plan. This report is the HRA Report which considers the potential affects of the Final Draft Local Plan with modifications.

This report accompanies consultation on proposed modifications to the Final Draft Local Plan following Examination hearings which took place in January / February 2022.

1.1 Background

Watford's existing Local Plan, consisting of the Part 1 Core Strategy 2006-31 (2013) and saved policies from the Watford District Plan (2003), are more than five years old. It is therefore out of date and existing planning policies have less weight when making planning decisions. A new Local Plan is required to manage the planning process and deliver the development needed in the area.

Since the adoption of the Core Strategy there have been changes to planning legislation and national planning guidance. This includes delivering new housing to meet a housing target based on the Government's standardised Objectively Assessed Need calculations. The housing requirement for Watford has increased from 260 dwellings per year in 2013 to 793 dwellings per year in 2019. New information is also available for employment and retail provision that can more accurately reflect changes anticipated with future population growth.

In September-October 2018 the council undertook the Issues and Options (Regulation 18) consultation seeking comments on the key issues facing the borough to 2037. The council has considered the comments received and the Sustainability Appraisal (SA) of options and used this information to prepare a Draft Local Plan in 2019. Between September and November 2019, the Council consulted on the Draft Local Plan and considered comments received and also the SA of the draft Local Plan. A revised version of the plan, the Final Draft Local Plan, was prepared in 2020 and subject to HRA screening and appropriate assessment. The Final Draft Local Plan was consulted on between 18th January 2021 and 1st March 2021 and submitted for Examination in August 2021. Examination hearings were undertaken in January / February 2022 and since then modifications have been proposed and are being consulted upon. The modifications have been subject to HRA screening in April / May 2022.

1.2 Habitats Regulations Assessment

In the UK, the Habitats Directive (92/43/EEC) has been transposed into domestic legislation as the Habitats and Species Regulations which requires an assessment of any plans which are likely to have a significant effect on any protected European sites, i.e. Special Areas of Conservation (SACs), Special Protection Areas (SPAs) and Ramsar wetland sites. This is commonly referred to as a Habitats Regulations Assessment (HRA). This requirement includes strategic plans with an impact on land use.

The conservation of Habitats and Species (Amendment) (EU Exit) Regulations 2019 were made on 14 March 2019. The Regulations ensure that the habitat and species protection and standards derived from EU law will continue to apply after Brexit. Amendments to the Habitats Regulations are largely limited to 'operability changes' that will ensure the regulations can continue to have the same working effect as now after the transition period.

The purpose of an HRA is to assess the significance of potential impacts of a plan on relevant European sites. The assessment should determine whether the plan would adversely affect the integrity of the site in terms of its nature conservation objectives. Where negative effects are identified, other options should be examined to avoid any potential for damaging effects.

HRA findings have fed into the parallel SA of the Local Plan which incorporates Strategic Environment Assessment, an integral part of the plan preparation process.

2 The Watford Local Plan

2.1 Background to the new Watford Local Plan

The Local Plan will replace the Core Strategy (adopted January 2013) and saved policies of the Watford District Plan (WDP) 2003 which are more than five years old.

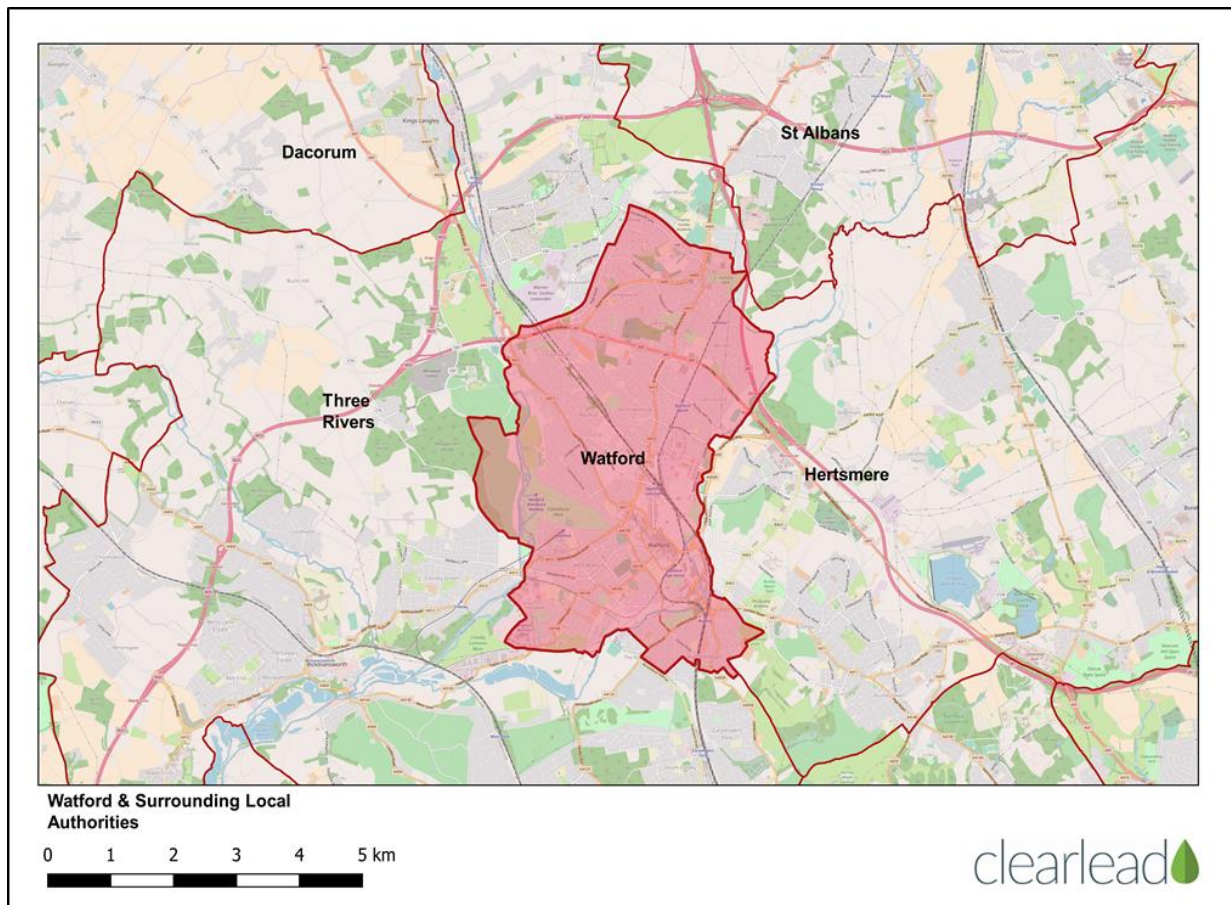

The Local Plan Review is needed in order to plan for a significant increase in housing need identified within the South West Hertfordshire Strategic Housing Market Assessment (SHMA). The SHMA was commissioned jointly by Dacorum, Hertsmere, Three Rivers and Watford Councils in 2015 in order to help inform local plans. The SHMA considers housing need arising over the 2013-2036 period. It considers the need for different types of housing and the housing needs of different groups within local communities. The Objectively-Assessed Need (OAN) for housing in Watford has been identified as 793 dwellings per year in 2019. This is a significant increase compared to the target of 260 homes for annum, which is the current target within the Core Strategy.

The Local Plan, when adopted, will form the development plan for Watford, along with Hertfordshire County Council Minerals and Waste Local Plans. The role of the Local Plan is to help deliver the Council's Corporate Business Plan and other Council policies and strategies, where relevant. It will set out the growth strategy for the borough during the plan period of 2021 to 2037.

2.2 Overview of the Plan Area

The Watford Local Plan Area is shown in Figure 2.1 (area in red).

Figure 2.1: Watford Local Plan Area

Watford is located in Hertfordshire, 17 miles north west of central London and is adjacent to the Greater London Area. The borough has an area of 2,142 hectares (8.3 square miles) and is the only non-metropolitan borough wholly within the M25. The borough is the largest urban area in South West Hertfordshire and supports the highest population density. It also has a strong concentration of services and facilities with considerable employment, retail and leisure opportunities. Formerly a market town, the settlement has grown significantly over time with its core being Watford town centre.

The population of Watford in 2016 was estimated to be 96,773¹ and it has continued to rise over the past 5 years. The borough has a younger than average population with a median age of 36.1 compared to 40 nationally and 39.7 countywide.

¹ Watford Borough Council Monitoring Report, 2016

2.3 Content of the Local Plan

The Local Plan sets out the Council's approach to new development up to 2037 and contains a spatial strategy policy in Chapter 1, Strategic Development Areas (SDA) in Chapter 2, site allocations in Chapter 13 and thematic or 'policies to guide development' in Chapters 3-12.

The spatial strategy policy SS1.1 is reproduced in Box 2.1 below.

The policies to guide development are intended to address local issues. In Watford, they ensure that the development is of high quality that will help Watford prosper as development takes place. As a suite of planning policies, together they are used to guide new development that delivers the vision and objectives set out in the Local Plan. They are a material consideration alongside national guidance when determining planning applications.

There are three SDA proposed in the borough with corresponding policies where new development will be supported in principle if it is consistent with the Local Plan. These policies set out key principles to steer development. These are supported by the site allocations within Chapter 13 of the Proposed Local Plan which include development considerations for each site. These SDAS can also be supported through other planning documents such as planning briefs, masterplans and supplementary planning documents.

Site allocations define land that has been identified for new development. These sites are where development would be acceptable in principle for a specified use such as housing, education, employment and community facilities or a mix of uses. The development potential is identified where appropriate and constraints that need to be considered when proposals are prepared. The site allocations are set out in Chapter 13 of the Local Plan and there are 62 in total.

Box 2.1 Local Plan Policy SS1.1 Spatial Strategy

The Local Plan makes provision for 13,171 additional homes and 10,700 additional jobs between 2021 and 2037, along with other supporting infrastructure. Proposals for new development will be supported, where they demonstrate that they will contribute towards the Local Plan's economic, social and environmental objectives, cumulatively achieving sustainable development.

Growth will be focused in the Core Development Area, which has excellent access to public transport and facilities, and where development can be accommodated sustainably, creating a high quality place to live, work and visit by 2037. Heritage assets and areas of greenspace will continue to be protected.

Development will make an effective and efficient use of land. This will need to support a mix of uses-uses compatible with each other, with high quality design, and innovative technology to address climate change and reduce carbon emissions.

Proposals will contribute towards a modal shift, greener travel patterns and minimising the impact on the environment. Pedestrian cycling and passenger transport travel will be prioritised.

These high standards and a positive and integrated approach to development will be expected across the whole of the borough. This will contribute towards creating attractive and inclusive neighbourhoods, supporting people to be more active, healthy and encourage greater social inclusion as part of a balanced community.

Across the borough, new infrastructure and improvements to existing infrastructure will be delivered to support development. Infrastructure proposals will be progressed collaboratively with relevant stakeholders and providers to maximise the benefits and success of any scheme.

All development will take place on brownfield, or previously developed land and only in exceptional circumstances will development on greenfield land be supported. Development in the Metropolitan Green Belt will not be supported unless it can be demonstrated that exceptional circumstances apply.

The Core Development Area

The Core Development Area is expected to support 80% of allocated development in the borough and provides opportunities for further redevelopment. Proposals in this area will be supported where they optimise the use of land in this location through mixed-use high-density development, with excellent access to services, facilities and public transport. Development should deliver positive social and environmental gains, incorporating high quality design and innovation to ensure high environmental standards are achieved.

The scale of change will be transformational in places. Collaboration between development partners and stakeholders on larger sites will be the key to unlocking the potential of the area. Ongoing and effective community engagement will also be required. Proposals should demonstrate a holistic approach to development, optimise opportunities for higher density development, create linkages to adjacent areas and ensure proper infrastructure provision.

Areas outside the Core Development Area

Outside the Core Development Area, proposals will be supported where they optimise densities to make efficient use of land and manage change with greater regard to the existing context and local character. Development should make the most of its location, such as access to public transport, cycling and walking and seek to provide off-site infrastructure to enhance them, and facilitate access to services and facilities.

High quality connections between people and destinations within the Core Development Area, wider town and locations outside of the borough will be sought.

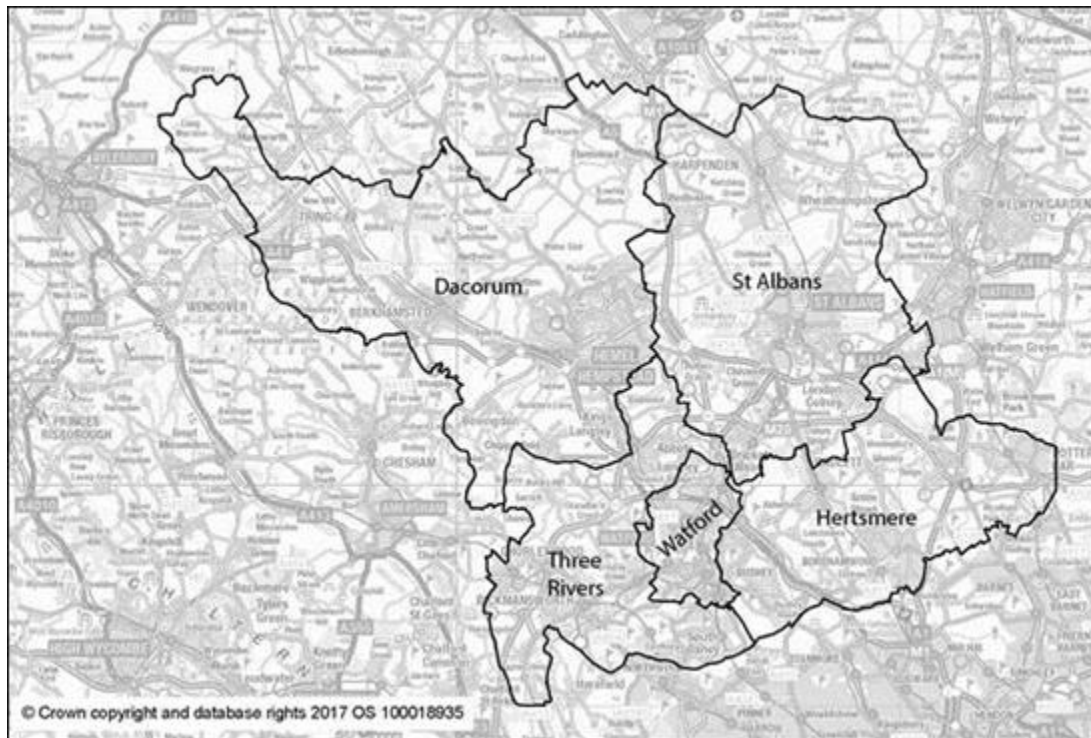

2.4 South West Hertfordshire Joint Strategic Plan

Watford Borough Council along with Dacorum Borough Council, St Albans City and District Council, Three Rivers District Council and Hertsmere Borough Council have begun work on a Joint Strategic Plan (JSP) for the South West Hertfordshire area (see map below). This work is also being supported by Hertfordshire County Council.

A key aim will be to ensure that infrastructure – such as transport, schools, health, and utilities (for example, water and sewerage) – are properly co-ordinated and delivered alongside the need for new homes and jobs. All five councils also make up a single housing market area. Each council is responsible for preparing their own Local Plan, but a JSP will set the strategic framework and shared priorities within which individual local plans can be prepared.

All five Councils have agreed a Memorandum of Understanding (MOU) to take the work forward.

Figure 2.2: Area to be covered by the South West Hertfordshire Joint Strategic Plan

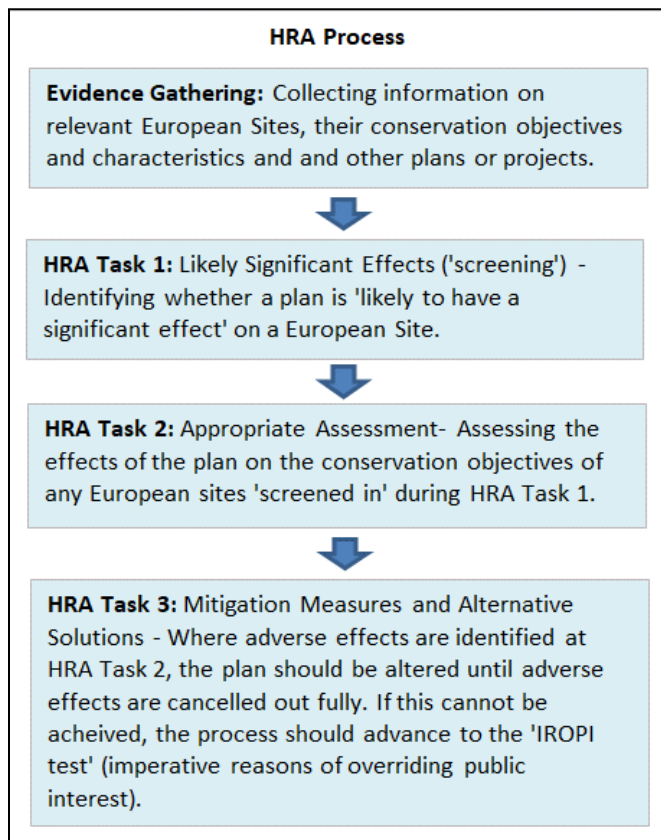

The JSP is at an early stage in development. Initial engagement with the public was undertaken between February and May 2020. The JSP will influence the end phase of the current Local Plans and the direction of travel for the next generation of Local Plans that will follow. It is not a statutory document, however, local authorities that share cross-boundary issues are encouraged by the government to prepare strategic plans as a way of maximising opportunities for growth and create greater benefits for communities.

3 Methodology

Figure 3.1 sets out the HRA process.

Figure 3.1 The HRA Process

During screening, the ‘Precautionary Principle’ needs to be applied: if an effect cannot be ruled out based on objective information it has been reported as “likely” or not possible to rule out. Furthermore, a judgement² by the Court of Justice of the European Union (People Over Wind) ruled that Article 6(3) of the Habitats Directive³ must be interpreted as meaning that mitigation measures (referred to in the judgment as measures which are intended to avoid or reduce effects) should be assessed within the framework of an appropriate assessment and that it is not permissible to take account of measures intended to avoid or reduce the harmful effects of the

² <http://curia.europa.eu/juris/document/document.jsf?docid=200970&doclang=EN>

³ Council Directive 92/43/EEC of 21 May 1992 on the conservation of natural habitats and of wild fauna and flora.

plan or project on a European site at the screening stage. The screening exercise must therefore consider elements of the plan without any proposed mitigation.

If Likely Significant Effects (LSEs) on European sites are identified in screening, measures must be put in place to avoid them. Further investigation may be necessary to understand how the plan might affect the integrity of European sites i.e. HRA Task 2 (Appropriate Assessment (AA)) and to develop effective avoidance and mitigation measures (or consider mitigation measures already proposed in relation to projects).

The following guidance has been referred to in undertaking the HRA:

- English Nature (2006) draft Guidance – The Assessment of Regional Spatial Strategies and Sub-regional strategies under the provisions of the Habitats Regulations;
- Scottish Natural Heritage (January 2015) Habitats Regulations Appraisal of Plans Guidance For Plan-Making Bodies In Scotland Version 3.0 originally prepared by David Tyldesley and Associates; and
- Department for Communities and Local Government (August 2006) Planning for the Protection of European Sites: Appropriate Assessment. Guidance for Regional Spatial Strategies and Local Development Documents. Draft.

3.1 Evidence Gathering

With reference to Figure 3.1, the evidence gathering task was initially completed in 2017 and updated in 2020.

European sites within a 20km radius of the Watford Borough boundary have been identified. This area of search reflects guidance recommendations as set out in Planning for the Protection of European Sites: Appropriate Assessment⁴. However, the distance itself is not a definitive guide to the likelihood or severity of impacts known to arise from developments and consideration has also been given to whether any other European sites can be linked to development within the Borough through a known 'pathway'⁵. Pathways are routes by which a change in activity within the Local Plan Area can lead to an effect upon a European site.

There are no European sites within the Watford Borough boundary.

⁴ Department for Communities & Local Government: Planning for the Protection of European Sites: Appropriate Assessment, 2006 (draft)

⁵ Scottish Natural Heritage (January 2015) Habitats Regulations Appraisal of Plans Guidance For Plan-Making Bodies In Scotland Version 3.0 – in the absence of a similar Government publication for HRA of plans in England, this guidance document provides useful and relevant guidance.

There are three European sites that are considered to have a potential impact pathway with development within the Watford Borough. These sites are:

- Burnham Beeches SAC;
- Chiltern Beechwoods SAC; and
- Wormley-Hoddesdonpark Woods SAC.

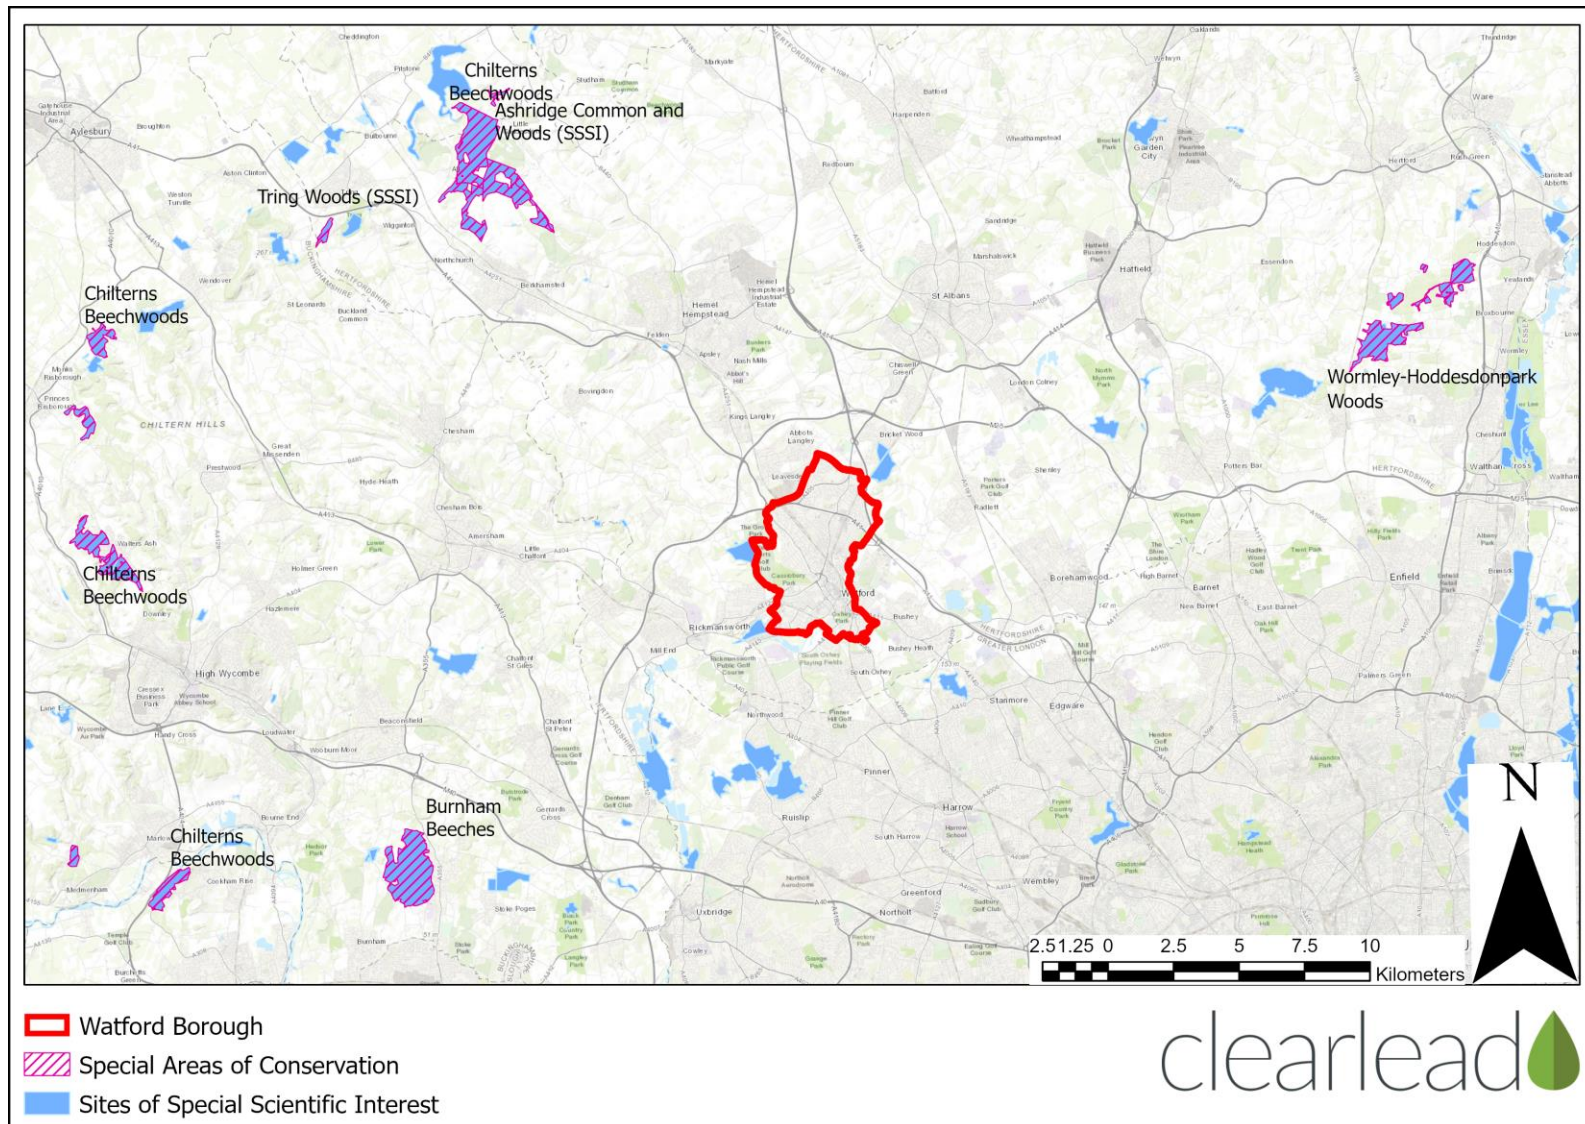

It is considered that there are no other European sites with which a pathway exists with development in the Borough.

ClearLead Consulting wrote to Natural England in December 2017 to confirm the scope of the Habitats Regulations Assessment (HRA) of the Local Plan. Natural England responded⁶ confirming that the three European sites which need to be considered in the HRA are Burnham Beeches SAC, Chiltern Beechwoods SAC; and Wormley-Hoddesdonpark Woods SAC.

These sites are shown in Figure 3.2.

⁶ Email letter from Natural England dated 31/01/18

Figure 3.2: European sites in and near to Watford Borough

Appendix A presents a summary of the site designations, qualifying features and site sensitivities. This information has been obtained from:

- Joint Nature Conservation Committee (JNCC) website www.jncc.gov.uk;
- Multi-Agency Geographical Information Centre (MAGIC) website www.magic.gov.uk; and
- Natural England site improvement publications.

3.2 Screening

In March 2020, the draft Local Plan was subject to HRA screening. Each policy within the plan was screened using the screening criteria described in Table 3.1 and with reference to the factors affecting the integrity of the three European sites set out in Appendix A. HRA guidance⁷ was used to develop the set of screening criteria presented in Table 3.1.

Table 3.1: Local Plan Screening Criteria	
Screening Rationale	Details
LSE	A likely effect is one that cannot be ruled out on the basis of objective information. The test is a 'likelihood' of effects rather than a 'certainty' of effects. Although some dictionary definitions define 'likely' as 'probable' or 'well might happen', in the Waddenzee case ⁸ the European Court of Justice ruled that a project should be subject to appropriate assessment "if it cannot be excluded, on the basis of objective information, that it will have a significant effect on the site, either individually or in combination with other plans and projects".
No LSE - A general policy statement	A general statement of policy sets out a strategic aspiration for the plan-making body for a certain issue. A general 'criteria based' policy expresses the tests or expectations of the plan-making body when it comes to consider particular proposals. Does not necessarily include more site specific criteria based policies which may require AA.

⁷ Scottish Natural Heritage (January 2015) Habitats Regulations Appraisal of Plans Guidance For Plan-Making Bodies In Scotland Version 3.0 originally prepared by David Tyldesley and Associates

⁸ European Court of Justice C-127/02

Table 3.1: Local Plan Screening Criteria	
Screening Rationale	Details
No LSE - Not proposals generated by this plan	Aspects excluded from the appraisal because they are not proposals generated by this plan.
No LSE - A protection policy	Aspects which protect the natural environment, including biodiversity, or conserve or enhance the natural, built or historic environment.
No LSE - No development or change	Aspects which will not lead to development or other change.
No LSE - Makes provision for change but no impact pathway	Aspects which make provision for change but which could have no conceivable effect on a European site, because there is no link or pathway between them and the qualifying interests, or any effect would be a positive effect, or would not otherwise undermine the conservation objectives for the site.
No LSE - Policy is too general	Aspects which are too general so that it is not known where, when or how the aspect of the plan may be implemented, or where any potential effects may occur, or which European sites, if any, may be affected.

In November 2020 the Final Draft Local Plan was subject to screening. The findings of the screening exercise are presented in Section 4 of this report.

Screening of the Final Draft Local Plan identified LSEs and therefore it has been necessary to proceed to the appropriate assessment stage of HRA (HRA Task 2 in Figure 3.1).

3.3 Appropriate Assessment

The Appropriate Assessment (AA) of the Final Draft Local Plan has considered the potential for the growth in Watford to contribute to an increase in air pollution both alone and in combination with growth in other neighbouring areas. This potential effect has been considered in relation to each of the European sites considered in the HRA:

- Burnham Beeches SAC;
- Chiltern Beechwoods SAC; and

- Wormley-Hoddesdonpark Woods SAC.

In order to assess the potential effects on each of the European Sites from an increase in air pollution, the road network around the plan area and the SACs was examined for the following:

- to identify whether strategic roads were present linking the plan area with the European sites; and
- to determine whether any of these strategic roads or associated linking roads occurred within 200m of each SAC (the effects of emissions from vehicles over this distance is considered negligible).

Information on commuting patterns for residents of the plan area was obtained by analysing the national census data⁹. The data shows where residents regularly drive to and from by car or van. This provides an indication of likely strategic routes where increases in traffic associated with the Local Plan could occur both alone and in combination with other plans. In addition, information on predicted transport changes within Hertfordshire between 2020 and 2036 was obtained by reviewing the Hertfordshire County Council Countywide Model of Transport¹⁰. Further information on this transport model is provided in Section 5.1.

Where appropriate, further information on traffic increase and subsequent air quality changes within each European site was collected by reviewing Local Plan HRAs of the district/borough where the European site was located.

3.4 Assessment Limitations

No significant limitations to the assessment were noted.

⁹ <https://www.nomisweb.co.uk/census/2011/WU03EW/chart/1132462215> website accessed 7/1/2020

¹⁰ Hertfordshire COMET: Local Plan Forecasting Report - LP5 (AECOM for Hertfordshire County Council, May 2020)

4 Screening Findings

4.1 Introduction

The Final Draft Local Plan was screened in November 2020. The detailed screening table can be found in Appendix B.

The policies which were screened in and for which LSEs were identified were:

Table 4.1 Local Plan Policies Screened in		
Policy Chapter	Policy Code	Policy Name
Chapter 1: A Spatial Strategy for Watford	SS1.1	Spatial Strategy
Chapter 3: Homes for a Growing Community	HO3.1	Housing Provision
Chapter 4: A Strong Economy	EM4.1 EM4.2 EM4.3	Providing New Employment Designated Industrial Areas Office Development
Chapter 13: Site Allocations and New Development	SA13.1	Allocated Sites for Delivery

All of the proposed site allocations detailed in policy SA13.1 were screened in, apart from two education sites.

The policies identified in Table 4.1 and the allocation sites were identified as having the potential to result in an in combination effect with growth in neighbouring areas which could increase air pollution from traffic and result in an LSE on the following European sites:

- Burnham Beeches SAC;
- Chiltern Beechwoods SAC; and
- Wormley-Hoddesdonpark Woods SAC.

All of these European sites are vulnerable to negative effects from air pollution.

No other potential LSEs were identified in the screening of the Final Draft Local Plan policies and site allocations which can be found in Appendix B. Modifications to the Final Draft Local Plan have been proposed by WBC following Examination hearings in January / February 2022. The modifications have been screened and no LSEs have been identified. The screening of modifications can be found in Appendix C.

5 Appropriate Assessment: Air Quality

5.1 Introduction and Background

Screening has identified the following policies could have a potential LSE on Burnham Beeches SAC, Chiltern Beechwood SAC and Wormley-Hoddesdonpark SAC due to potential effects from increased air pollution:

- Policy SS1.1 Spatial Strategy;
- HO3.1 Housing Provision;
- EM4.1 Providing New Employment;
- EM4.2 Designated Industrial Areas;
- EM4.3 Office Development; and
- SA13.1 Allocated Sites for Delivery (except the two education allocation sites).

The Site Improvement Plan for each SAC identifies air pollution as a threat to each site. Nitrogen deposition levels currently exceeds the site-relevant critical load class for the qualifying features of each SAC as defined on the Air Pollution Information System (APIS)¹¹.

The Local Plan could potentially cause an adverse effect on these European sites if traffic (and therefore emissions to air) were to increase beyond the Plan Area for trips to access employment or other facilities such as recreation, cultural or retail. This could result in an increase in nitrogen deposition, which could have an effect on those habitats sensitive to additional nitrogen through eutrophication, which could lead to effects such as a change in species composition.

Natural England has advised that emissions from point sources more than 200m from the boundary of a site can be considered negligible¹² (this does not mean that there is not the possibility of impacts due to increasing emissions from diffuse sources).

Hertfordshire County Council has developed a Countywide Model of Transport, COMET. This consists of a suite of models including a Variable Demand Model, Highways Model and Public

¹¹ www.apis.ac.uk

¹² Letter from English Nature to Runnymede Borough Council, dated 16th May 2006, regarding Conservation (Natural Habitats &C.) Regulations 1994 Runnymede Borough Local Development Framework

Transport Model and has been used to test the cumulative impacts of Local Plan growth across the county.

A new 2036 Forecast Model run was undertaken in early 2020 with districts Local Plan development assumptions as of Autumn 2019. Local Plan growth plus transport mitigation measures as identified by the districts and boroughs has been tested.

Countywide results of the latest Local Plan Run 5 have been documented in the Forecasting Report. The COMET model enables an interpretation of potential impacts across the whole area considering the influence of growth and schemes in other areas.

Hertfordshire County Council have prepared a subsequent interpretation report¹³ which provides a more detailed assessment of the model results within the Watford area, taking into account the cumulative impact of growth and potential transport schemes across this area and in other Hertfordshire districts.

Planning assumptions were agreed with Watford Borough Council in Autumn 2019. These include developments completed since 2014 (which is the base year of the model), those already in the planning system, and an allowance for windfall as well as Local Plan sites. These fed into COMET Local Plan Run 5. Run 5 is a model run to determine the cumulative impact of growth across the county and beyond.

A number of transport schemes which were deemed as committed or highly likely along with appropriate access points from the key developments were already coded into the model. In addition, there are general schemes identified in Local Plan Infrastructure Delivery Plans, emerging Growth and Transport Plans and other studies to accommodate growth. In some cases, the impact of sustainable transport measures has been indirectly modelled as speed reductions or mode shifts.

A series of additional sustainable travel measures are planned for the Watford Urban Area. These include school and workplace travel planning and improvements to bus service quality. To simulate the impact of these on the 2036 Future Year, a mode shift away from the car has been applied to journeys with an origin and destination within Watford Borough.

Part of the Chiltern Beechwoods SAC occur within Hertfordshire and the information within this transport model is discussed in Section 5.2.2. The transport model data was not considered relevant to the other SACs due to their distance from the Hertfordshire border.

¹³ Watford Interpretation of COMET Model Results (Hertford Shire County Council, May 2019)

5.2 Assessment of effects alone and in combination

5.2.1 Burnham Beeches SAC

Burnham Beeches SAC is located in South Bucks District and occurs approximately 15.4km to the southwest of the Plan Area. The shortest route by road from the Plan Area to the SAC is approximately 28.5km via the M40 and A355. The A355 is the only primary road within 200m of the SAC and connects the M40 with Slough to the south. This road is not considered to be a strategic route for Watford Borough residents travelling to work; analysis of commuting patterns using national census data found that neither South Bucks nor Slough were considered to be key commuting areas¹⁴. The data shows that residents from the Plan Area commuted by car or van primarily into Greater London and, to a lesser extent, neighbouring areas within South West Hertfordshire.

Although this SAC occurs within the screening radius of 20km, the actual distance to drive to the site is 28.5km which far exceeds this distance. Contribution to traffic along roads within 200m of Burnham Beeches as a result of the Local Plan would therefore be *de minimis* and no further assessment is proposed.

This approach and conclusion are in accordance with the HRA of the South Oxfordshire Local Plan¹⁵, which has been approved by Natural England, and the HRA of Dacorum Local Plan¹⁶, which is currently being consulted on.

It is therefore concluded that the Local Plan would not result in adverse effects on the Burnham Beeches SAC either alone or in combination with growth from neighbouring plans and projects.

5.2.2 Chiltern Beechwoods SAC

The Chiltern Beechwoods SAC (Ashridge Commons and Woods SSSI) is located in the Borough of Dacorum approximately 13.1km to the north west of the Local Plan Area. The shortest route by road from the Plan Area to the SAC is approximately 19.5km via Watford Road and the A41 to the B5406 which occurs within 200m of the SAC. Dacorum is identified by the Office for National Statistics as a key commuting area for residents of the Plan Area. However, the vast majority of Watford residents that commute to Dacorum are likely to work in the main town of Hemel

¹⁴ <https://www.nomisweb.co.uk/census/2011/WU03EW/chart/1132462215> website accessed 7/1/2020

¹⁵ LUC (2018). South Oxfordshire Local Plan Habitats Regulations Assessment Report.

¹⁶ TRL (2020). Dacorum Borough Council Local Plan Habitats Regulations Assessment Screening Report.

Hempstead which lies between the Plan Area and the SAC. The B5406 is not considered to be a strategic route for residents within Watford Borough. Indeed, the Watford Interpretation of COMET Model Results demonstrates that traffic is predicted to be reduced in 2036 on Watford Road within the Plan Area, which is the main route linking Watford with the A41 and B5406. Watford Road and the A41 also link the Plan Area with Tring Woodland SSSI which is also a component of the SAC. Tring Woodland SSSI is located approximately 19km west of the Plan Area and approximately 22.5km by the road. The A41 lies within 200m of this SSSI. The A41 is not considered to be a strategic route for Watford Borough residents and, therefore, increases in traffic along this road as a result of the Local Plan would be negligible.

Overall, it is therefore concluded that the Watford Local Plan would not result in an adverse effect on the integrity of the Chiltern Beechwoods SAC either alone or in combination with neighbouring plans and projects.

5.2.3 Wormley-Hoddesdonpark Woods SAC

The Wormley-Hoddesdonpark Woods SAC is located approximately 18.7km to the east of the Plan Area. The shortest route by road from the Plan Area to the SAC is approximately 27km via the M25 to Darnicle Hill which runs immediately adjacent to the SAC. Darnicle Hill is a minor road and no increase in traffic along this road is predicted as a result of policies within the Watford Local Plan. The A10 is the only primary road which runs within 200m of the SAC and the section of road which occurs adjacent to the SAC is approximately 35km from the Plan Area. The A10 is not considered to be a strategic route used by Watford Borough residents and therefore increases in traffic as a result of the Local Plan would be negligible.

In addition, only a relatively small area of SAC occurs within 200m of the A10 which is considered too small to be adversely affected by a reduction in air quality. This issue was considered in detail within the HRA of the Broxbourne Local Plan as this SAC is partly located within that Local Plan area. The HRA reached the same conclusion which was agreed by Natural England.

It is therefore concluded that the Watford Local Plan would not result in an adverse effect on the integrity of the Wormley-Hoddesdonpark Woods SAC either alone or in combination with neighbouring plans and projects.

6 Conclusions

Examination of the road network shows that the actual travelling distances via road between the Plan Area and the European Sites are at least 19.5km. No strategic routes used by residents of the Plan Area were identified within 200m of the SACs. Any contribution to traffic along roads within 200m of the SACs as a result of the Local Plan would be *de minimis*. It is therefore concluded that the Local Plan would not result in an adverse effect on the integrity of the Burnham Beeches SAC, the Chiltern Beechwoods SAC or the Wormley-Hoddesdonpark Woods SAC either alone or in-combination with growth from neighbouring plans and projects.

The Final Draft version of the Local Plan was consulted on between 18th January 2021 and 1st March 2021. A letter was received from Natural England dated 5th July 2021 in relation to the Final Draft Local Plan HRA Report (January 2021) confirming that Natural England is:

“satisfied that a conclusion by the Local Planning Authority (as competent authority) that there will be no adverse effects on European sites would be appropriate, and therefore advise that further Habitats Regulations Assessment is not required”.

Modifications to the Final Draft Local Plan have been proposed by WBC in June/July 2021. The modifications have been screened and no LSEs have been identified. Therefore the conclusions of the HRA remain the same: the Watford Local Plan will not result in any adverse effects on European site both alone and in combination.

7 Next Steps

This HRA Report is being published alongside the proposed modifications to the Final Draft Watford Local Plan in June 2022. Should any further changes be made to the Local Plan following consultation, these will be screened for potential LSEs.

Table 7.1: Watford Local Plan Timetable	
Local Plan Activity	Timeframe
Modifications consultation	June – July 2022
Adoption	Q4 2022

Appendix A – Information About European Sites

Table A.1: Burnham Beeches SAC	
Name	Burnham Beeches SAC UK0030034
Location with regards to plan area	The site occurs approximately 15.4km to the south west of the plan area.
Reason(s) for designation:	
ANNEX I Habitats <ul style="list-style-type: none"> • 9120 Atlantic <i>acidophilous</i> beech forests with <i>Ilex</i> and sometimes also <i>Taxus</i> in the shrublayer (<i>Quercion robori-petraeae</i> or <i>Illicic-Fagenion</i>) 	
Component SSSI sites	<ul style="list-style-type: none"> • Burnham Beeches SSSI
Conservation objectives	Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring; <ul style="list-style-type: none"> • The extent and distribution of qualifying natural habitats; • The structure and function (including typical species) of qualifying natural habitats; • The supporting processes on which qualifying natural habitats rely.¹⁷

¹⁷ Natural England 30 June 2014 – version 2. <http://publications.naturalengland.org.uk/publication/6014456282742784>

Table A.1: Burnham Beeches SAC
Vulnerability and current conditions
<p>During the most recent condition assessment of the four SSSI units within the site (2006, 2008 and 2010), three of the units were assessed as being in 'Favourable' condition. The remaining unit was in 'Unfavourable Recovering' condition due to containing stands of conifers with limited regeneration and patchy understorey/ground flora.</p> <p>A summary of discussions with those responsible for managing the site is detailed in Liley <i>et al</i> (2012)¹⁸. Despite the majority of the SAC habitat being assessed by Natural England as being in favourable condition, there are concerns due to an increased rate of veteran tree loss caused by inappropriate veteran tree management and an increasing gap between young and ancient trees.</p> <p>Health monitoring of trees is carried out at Burnham Beeches, with staff undertaking detailed surveys of ancient pollards on a 10 year cycle, a less intensive check for management requirements every two years and tree health surveys in both winter and summer (Liley, <i>et al</i> 2012). Members of staff who carry out the health monitoring have noticed that the young trees are showing signs of ill health.</p>
Key factors currently impacting or threatening site integrity and/or the conservation objectives¹⁹
<ul style="list-style-type: none"> • Air pollution: risk of atmospheric nitrogen deposition - lichen communities associated with trees are sensitive to nitrogen deposition. • Public access/disturbance – veteran trees are vulnerable to damage as a result of soil compaction due to trampling or vehicle movement over the root zone. • Habitat fragmentation – pressure from new housing development risks isolating the site from surrounding countryside. • Deer – numerous in parts of the site and causing adverse impacts on tree regeneration and ground flora. • Species decline – the number of veteran trees on site are declining and there is a significant age gap between these and the next generation.

<http://publications.naturalengland.org.uk/publication/5689860228644864>

Table A.1: Burnham Beeches SAC

- Invasive species – oak processionary moth occurs nearby. Rhododendron occurs across the site which also act as a host for the pathogens causing sudden oak death (which also affects beech).

Table A.2: Chiltern Beechwoods SAC

Name	Chiltern Beechwoods SAC UK0012724
Location with regards to plan area	The site occurs approximately 13.1km to the north west of the plan area.
Reason(s) for designation:	
<p>ANNEX I</p> <p>Primary</p> <ul style="list-style-type: none"> • 9130 <i>Asperulo-Fagetum</i> beech forests <p>Non Primary</p> <ul style="list-style-type: none"> • 6210 Semi-natural dry grasslands and scrubland facies on calcareous substrates (<i>Festuco-Brometalia</i>; important orchid sites) <p>ANNEX II species</p> <p>Non Primary</p> <ul style="list-style-type: none"> • 1083 Stag beetle <i>Lucanus cervus</i> 	
Component SSSI sites	<ul style="list-style-type: none"> • Ashridge Commons and Woods SSSI • Aston Rowant Woods SSSI • Bisham Woods SSSI • Bradenham Woods, Park Wood and The Coppice SSSI • Ellesborough and Kimble Warrens SSSI

Table A.2: Chiltern Beechwoods SAC	
	<ul style="list-style-type: none"> • Hollowhill and Pullingshill Woods SSSI • Naphill Common SSSI • Tring Woodlands SSSI • Windsor Hill SSSI
Conservation objectives for the SPA	<p>Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring;</p> <ul style="list-style-type: none"> • The extent and distribution of qualifying natural habitats and habitats of qualifying species; • The structure and function (including typical species) of qualifying natural habitats; • The structure and function of the habitats of qualifying species; • The supporting processes on which qualifying natural habitats and the habitats of qualifying species rely; • The populations of qualifying species, and, • The distribution of qualifying species within the site.²⁰
Vulnerability and current condition	
<p>The Ashridge Commons and Woods SSSI is the only component SSSI of the SAC which occurs within 19km of the plan area and therefore only this SSSI condition assessment was reviewed. Six of the seven units within this SSSI were in 'Favourable Condition' with the remaining unit in 'Unfavourable Recovering' condition primarily due to deer browsing on young growth which appears to be having an adverse impact on the regeneration of trees.</p> <p>The majority of Beechwoods in the Chilterns are very uniform in terms of age-class and species composition, as a result of historical promotion of beech as a timber tree. Significant changes to the structural and species diversity of these woods are required in order to promote a more natural composition. Beech woodland in the Chilterns is currently facing a decline due to a very low market value for timber and damage to young trees by grey squirrels. The availability of financial support through the Woodland Grant Scheme goes some way in helping to address this issue but it is not clear whether this offers</p>	

²⁰ Natural England 30 June 2014 – version 2. <http://publications.naturalengland.org.uk/publication/4808896162037760>

Table A.2: Chiltern Beechwoods SAC

sufficient incentive to woodland managers to continue to manage in ways which will promote an increase in structural and species diversity of the characteristic beechwood communities. In particular, there may be a lack of sufficient financial support to provide for the retention of a larger proportion of mature trees in order to increase the provision of deadwood habitat. This latter issue is the subject of a joint national review by Natural England and the Forestry Commission.

Key factors currently impacting or threatening site integrity and/or the conservation objectives²¹

- Forestry and woodland management – woodland management has resulted in a uniform age structure in parts with few gaps in the canopy and restricted regeneration. Climate change may also impact on woodland regeneration and species composition.
- Deer – browsing prevents or hinders natural regeneration of trees and ground flora.
- Changes in species distributions – appropriate monitoring of stag beetle population is not being undertaken, making it difficult to manage the population or its habitat.
- Invasive species – grey squirrels and edible dormouse damage growing trees by bark stripping.
- Disease - box blight has been recorded on part of the SAC which could affect species composition of the site.
- Public access/disturbance – removal of dead wood by the public is an issue on some parts of the SAC which could impact saproxylic invertebrate fauna.
- Air pollution: impacts of atmospheric nitrogen deposition. Atmospheric nitrogen deposition exceeds the critical loads for ecosystem protection. Some parts of the site are recorded as unfavourable (recovering), but impacts associated with nitrogen deposition are unclear.

<http://publications.naturalengland.org.uk/publication/6228755680854016>

Table A.3: Wormley Hoddesdonpark Wood SAC	
Name	Wormley Hoddesdonpark Woods SAC UK0013696
Location with regards to plan area	The site occurs approximately 18.7km to the east of the plan area.
Reason(s) for designation:	
ANNEX 1 habitats: Primary: 9160 Sub-Atlantic and medio-European oak or oak-hornbeam forests of the <i>Carpinion betuli</i> .	
SSSI component sites	<ul style="list-style-type: none"> • Wormley-Hoddesdonpark Wood North SSSI • Wormley-Hoddesdonpark Wood South SSSI
Conservation objectives	<p>Ensure that the integrity of the site is maintained or restored as appropriate, and ensure that the site contributes to achieving the Favourable Conservation Status of its Qualifying Features, by maintaining or restoring:</p> <ul style="list-style-type: none"> • The extent and distribution of qualifying natural habitats; • The structure and function (including typical species) of qualifying natural habitats; and • The supporting processes on which qualifying natural habitats rely.²²
Vulnerability and current conditions	
<p>During the most recent condition assessment of the SSSI units (2010 and 2012), the majority of the SSSI units within the site were in 'Favourable Condition', with the remaining units in 'Unfavourable Recovering' condition primarily due to management activities, although there is also reference to fly tipping within this unit.</p> <p>The majority of the woods in the complex are in sympathetic ownership with no direct threat (Hoddesdon Park Wood, for example, is managed by the Woodland Trust). There is some pressure from informal recreation, and there has been limited damage in the past (for example from four-wheel drive vehicles). However, most recreation is concentrated on well-established paths. Most of the complex is covered by a High Forest Zone Plan (Hertfordshire</p>	

²² Natural England 30 June 2014 – version 2. <http://publications.naturalengland.org.uk/publication/4919819195383808>

Table A.3: Wormley Hoddesdonpark Wood SAC

County Council 1996) which sets out a framework for woodland management across the whole area. It aims to restore a varied age structure and natural stand types through sustainable forestry. There have been some instances of fly-tipping in the recent past, and this does increase the risk on non-native species, such as cherry laurel and privet from garden waste. Coupled with instances of car dumping, this does indicate that the site attracts some urbanisation pressures.

Key factors currently impacting or threatening site integrity and/or the conservation objectives²³

- Disease - Acute Oak Decline is present in at least two parts of the site and affects both native oak species;
- Invasive species - invasive species currently within the site include sycamore, turkey oak, rhododendron and snowberry;
- Air pollution: risk of atmospheric nitrogen deposition – nitrogen deposition exceeds the site-relevant critical load and hence there is a risk of harmful effects.
- Deer - browsing within the woodland is reducing natural tree regeneration and damaging the woodland;
- Vehicles – current illicit vehicle use is causing localised rutting and soil compaction, which is damaging the woodland ground flora, shrubs and trees. Fly-tipping directly damages the ground flora.
- Woodland management – lack of active management in parts of the site could lead to a reduction in structural and species diversity, the loss of temporary and permanent open space, over-shading, deterioration of veteran pollards and spread of invasive species.
- Recreational pressures - extensive public access occurs on part of the site. Sensitive management of access points and routes by the site’s main owners has been largely successful in mitigating the potential adverse effects of this high-level use. However, visitor numbers continue to increase, the types of use can change unpredictably and less obvious adverse effects on important flora and fauna could be missed during routine, ‘general purpose’ monitoring.

Appendix B – Policy Screening

Table 3B1: Local Plan Screening Criteria	
Screening Rationale	Details
LSE	A likely effect is one that cannot be ruled out on the basis of objective information. The test is a 'likelihood' of effects rather than a 'certainty' of effects. Although some dictionary definitions define 'likely' as 'probable' or 'well might happen', in the Waddenzee case ²⁴ the European Court of Justice ruled that a project should be subject to appropriate assessment "if it cannot be excluded, on the basis of objective information, that it will have a significant effect on the site, either individually or in combination with other plans and projects".
No LSE - A general policy statement	A general statement of policy sets out a strategic aspiration for the plan-making body for a certain issue. A general 'criteria based' policy expresses the tests or expectations of the plan-making body when it comes to consider particular proposals. Does not necessarily include more site specific criteria based policies which may require AA.

²⁴ European Court of Justice C-127/02

Table 3B1: Local Plan Screening Criteria	
Screening Rationale	Details
No LSE - Not proposals generated by this plan	Aspects excluded from the appraisal because they are not proposals generated by this plan.
No LSE - A protection policy	Aspects which protect the natural environment, including biodiversity, or conserve or enhance the natural, built or historic environment.
No LSE - No development or change	Aspects which will not lead to development or other change.
No LSE - Makes provision for change but no impact pathway	Aspects which make provision for change but which could have no conceivable effect on a European site, because there is no link or pathway between them and the qualifying interests, or any effect would be a positive effect, or would not otherwise undermine the conservation objectives for the site.
No LSE - Policy is too general	Aspects which are too general so that it is not known where, when or how the aspect of the plan may be implemented, or where any potential effects may occur, or which European sites, if any, may be affected.

Table B.2 HRA Screening Final Draft Watford Local Plan Policies

Policy number	Policy name	Screening decision	Reason	Comments	Potential effects on European sites:

EM4.1	Providing New Employment	In	LSE	This policy supports proposals for new employment floor space within the borough where they contribute towards meeting the identified employment need in the borough and Functional Economic Market Area. To meet these challenging targets, the Local Plan will seek to prevent the net loss of both office and industrial floor space across the borough. New office growth will be prioritised at the Clarendon Road Primary Office Location and new industrial growth will be prioritised in the five Designated Industrial Areas within the borough. Over the plan period, the Council will seek to plan for the creation of 13,000 new jobs. This policy requires further investigation to ensure that employment development at the Clarendon Road Primary Office Location and in Designated Industrial Areas will not increase road traffic near to the European sites identified.	air quality potential in combination effects with growth in other areas	air quality potential in combination effects with growth in other areas	air quality potential in combination effects with growth in other areas

Appendix C - Screening of Proposed Modifications to the Watford Final Draft Local Plan

The following tables presented the schedule of the proposed main text modifications includes changes since the Regulation 19 version of the Local Plan aimed at resolving any potential soundness and/or legal compliance issues identified during the Regulation 19 Consultation.

Reasons for modification can include:

- Positively prepared
- Justified
- Effective
- Consistent with national policy

The schedule is ordered by chapter and modification number and contains the policy reference/paragraph number and page number for each modification.

Deleted text, maps or other figures are shown with a ~~red-strike-through~~; additions and replacements are underlined in green. Dots denote where the paragraph / policy continues before/after the text shown in the modification.

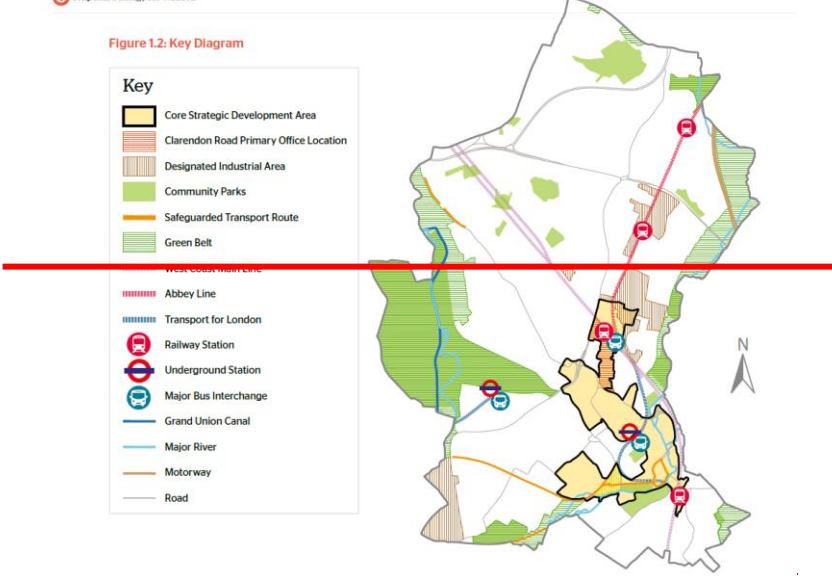

The proposed modifications will subsequently change the document numbering. The policy, paragraph and bullets referenced in this schedule are those found in the Regulation 19 Publication version of the Local Plan.

An HRA screening column has been added to the right hand side. This column identifies whether any of the modifications could result in an LSE on the European sites considered in this HRA.

Main Modification Number	Page, Local Plan paragraph, policy (in Final Draft Watford Local Plan Regulation 19 consultation document)	Modification (deleted text shown as red strike-through and additional text shown green <u>underlined</u>). Unchanged text is in black font.	Reason for modification and Comment ID number	HRA Screening
How to use this document (introduction)				
M1	Page, 6, after Table 'The Local Plan and the Spatial Strategy'	<u>The diagrams covering the borough at the beginning of the majority of chapters are included to provide context to the strategic objectives of the Local Plan and opportunities to consider when development comes forward. This also applies to the schematic diagrams for each of the three Strategic Development Areas. The strategic maps are not intended to demonstrate policy requirements and are indicative only. Where specific areas and sites within the borough are covered by particular policies, these are defined on the Policies Map.</u>	<ul style="list-style-type: none"> • Consistent with national policy • Officer change 	N

<p>M21</p>	<p>Page 25, after paragraph 2.14, new paragraph, delete last sentence of preceding paragraph. Revise paragraph 2.15</p>	<p>However, the compatibility of new and existing uses will need to be carefully considered, particularly where when residential uses are also being proposed.</p> <p><u>The transformation of the area from an under-utilised employment area to a mixed-use area inclusive of new homes, employment space and community facilities will take place throughout the plan period. It will encompass a new Eastern Mobility Hub east of the railway lines connecting to the Sustainable Transport Hub located west of the railway lines at Watford Junction Station. This will likely come forward in phases as infrastructure is delivered and development opportunities present themselves.</u></p>	<ul style="list-style-type: none"> • Effective ○ ID 1972 Canada Life Asset Management ○ ID 2075 Aggregates Industries UK Ltd 	<p>N</p>

		<p><u>In the first part of the plan period, proposals for the redevelopment of employment floorspace with either replacement or alternative forms of employment uses will be supported. Mixed-use development that may include residential uses that contribute towards the long-term vision of the area will be supported and in such circumstances the loss of employment floorspace may be acceptable. The compatibility of new and existing uses will need to be carefully considered, particularly where when residential uses are proposed in the area as the ‘agent of change’ principle will need to be addressed.</u></p> <p>The concrete batching plant and rail aggregates depot (<u>including road access from Orphanage Road and rail sidings running parallel to the Abbey Line</u>) is safeguarded by the Hertfordshire Minerals Local Plan and subject to a 250m Minerals Infrastructure Consultation Area. Its Relocation of the facility will be challenging to achieve and will only be supported where a suitable alternative location has been identified that meets the operational requirements and environmental criteria. <u>New development coming forward in the surrounding area should assume that the facility will remain for the long-term. New development will be required to be designed and mitigated to ensure that it will not prejudice existing or future use of the safeguarded site and associated operations in accordance with the ‘agent of change’ principle. Appropriate mitigation provided by new development may include locating non-residential floorspace in the lower storeys, orientating habitable rooms, balconies and gardens away from the safeguarded operations, and providing buffer development or screening between the sensitive uses and the safeguarded facility.</u></p>		
M22	Page 25, paragraph 2.16,	<p>Reprovision of car parking, including access, will need to be considered at a strategic level across the area to avoid fragmentation and inefficient use of land. Large areas of scattered car parking throughout the Strategic Development Area should be avoided. Proposals for car parking that come forward independently of a car parking strategy for the area, or a future masterplan, will not be supported where they could compromise the road network or infrastructure for alternative forms of active travel, such as cycling and walking. <u>A new multi-storey car park will be provided as part of the Eastern Mobility Hub east of the Abbey Line. Any proposals that come forward which include the loss of the existing multi-storey car park and surface parking will need to demonstrate how the replacement facility will be delivered.</u></p>	<ul style="list-style-type: none"> ● Effective ○ Officer change 	N
M23	Page 25, paragraph 2.17, after fifth sentence	<p><u>When the area comes forward with more comprehensive mixed-use development in the second part of the plan period and longer-term, a</u> route for a second bridge that connects Penn Road with Watford Junction is to be protected so that new development does not compromise potential access to the area in the future.</p>	<ul style="list-style-type: none"> ● Effective ○ ID 1972 Canada Life Asset Management 	N

M24	Page 26, after paragraph 2.22	<p><u>Delivery and managing development</u></p> <p><u>The Watford Gateway Strategic Development Area consists of two constituent parts: land around Watford Junction Station and the area of Clarendon Road.</u></p> <ul style="list-style-type: none"> <u>East of Watford Junction Station and west of the Abbey Line, site MU05 is a high density development with planning consent to be delivered over several phases to 2031. Site MU06 is located adjacent to the south and will come forward in phases across the plan period. The existing car park is expected to be reprovided as part of the Eastern Mobility Hub. This will help to unlock the central part of site MU06 and support the delivery of a mixed-use quarter in the later stages of the plan period. Road access to the facility will be from Clive Way and a pedestrian/cycle crossing over the West Coast Mainline will provide access to Watford Junction Station, which itself will be improved to increase capacity. The crossing may be delivered in either a single phase across both the West Coast Mainline and Abbey Line or in two phases with a crossing over the West Coast Mainline in the first part of the plan period alongside site MU06, followed with an extension to the crossing that would enable access to land east of the Abbey Line in the later stages of the plan period. If the latter, the crossing will need to be designed so that it may be adapted to support an extension at a later time.</u> <p><u>While sites MU07 and MU24 are likely to be redeveloped for industrial uses in the first part of the plan period, delivery of the aforementioned facilities will support redevelopment for mixed-use development on land located east of the Abbey Line in the latter stages of the plan period. With the crossing over the West Coast Mainline in place along with the Eastern Mobility Hub, a pedestrian/cycle crossing over the Abbey Line will be delivered to improve access from the east side of Watford Junction Station and reduce the pressure associated with access via the west entrance located opposite Clarendon Road. This will be supported by enhancements to the station, including the forecourt, in the early part of the plan period and ongoing improvements to Clarendon Road.</u></p> <ul style="list-style-type: none"> <u>Clarendon Road is well established as a commercial office district and is subject to an increasing number of proposals for higher density development. Much of the area is unallocated and proposals are anticipated to come forward as windfall as redevelopment opportunities arise. As the area continues to intensify, it is envisaged that further investment interest will be secured in the area reflecting the objectives for this part of the Strategic Development Area.</u> 	<ul style="list-style-type: none"> • Effective <ul style="list-style-type: none"> ○ Officer change 	N

M170	Page 147, Paragraphs 12.4, 12.5, 12.6	<p>12.4 A Health Impact Assessment seeks to inform and influence decision making, ensuring that health impacts, and the distribution of these impacts, are considered as part of the planning policy process. They provide a mechanism to understand more broadly how a wider range of economic, environmental and social factors can combine to affect a development.</p> <p>12.5 The Position Statement: Health Impact Assessments (Hertfordshire County Council, 2019) sets out guidance for how a Health Impact Assessment should be undertaken. It seeks to facilitate higher quality development of schemes of 100 or more residential units. This can be applied flexibly depending on the nature of a development proposal. Following a staged methodology from when a scheme is designed, through to construction and occupation, a clear brief is produced from the screening and scoping stages to determine the type of Health Impact Assessment that may be required. The two types of Health Impact Assessment are:</p> <ul style="list-style-type: none"> • Rapid Assessment for simpler proposals; • In-depth Health Impact Assessment for more complicated or larger proposals. <p>12.6 Large development proposals can benefit from undertaking an objective Health Impact Assessment, which is used to inform the design of a scheme to improve its design and increase the likelihood of gaining planning approval, as they summarise many of the issues set out in policies in the Local Plan. In-depth Health Impact Assessments will be supported on large scale development proposals, however, all major proposals are encouraged to consider undertaking a Rapid Health Impact Assessment, as a minimum, to support their planning application.</p> <p><u>The Watford Local Plan seeks to ensure that positive opportunities from development are optimised and that any unintended consequences do not have a disproportionate</u></p>	<ul style="list-style-type: none"> ● Effective ○ ID 2204 Hertfordshire County Council 	N

impact upon the population, especially those more at risk from health inequalities. A Health Impact Assessment (HIA) is an essential assessment for any development proposal to demonstrate that it will not have negative implications for the physical health and mental wellbeing of both existing communities in the vicinity, as well as the future residents of the new development. Health Impact Assessments are a tool through which development can:

- Understand the local community health needs and demonstrate how it can support these;
- Demonstrate how it has considered health inequalities;
- Meet the requirements of the Environmental Impact Assessment (EIA) Regulations for human health;
- Meets the policy requirements of the Watford Local Plan that major development proposals undertake a Health Impact Assessment;
- Demonstrate the opportunities of a proposal and how a development has been positively planned.

Hertfordshire County Council has adopted a Health Impact Assessment Position Statement which sets out when a Health Impact Assessment should be undertaken and frameworks to use for each stage of the Health Impact Assessment process. The Health Impact Assessment Position Statement sets out a threshold for different types of development, including a threshold for the development of 100 residential units or more to be subject to a Health Impact Assessment. ~~This can be applied flexibly depending on the nature of a development proposal.~~ Following a staged methodology from when a scheme is designed, through to construction and occupation, a clear brief is produced from the screening and scoping stages to determine the type of Health Impact Assessment that may be required. The two types of Health Impact Assessment are:

- Rapid Assessment for simpler proposals;
- In-depth (comprehensive) assessment for more complicated or larger proposals

Large development proposals can benefit from undertaking a Health Impact Assessment, which is used to inform the design of a scheme to improve its design and increase the likelihood of gaining planning approval, as they summarise many of the

		issues set out in policies in the Local Plan. In-depth, or comprehensive Health Impact Assessments will be supported on large-scale development proposals, however, all major proposals are encouraged to consider undertaking a Rapid Health Impact Assessment to support their planning application.		
M171	Page 148, Policy HC12.3	<p>Proposals for new, extended or improved cultural and community uses that address a demonstrated demand from the local community will be supported. Such uses should be located within sustainable, accessible locations close to the identified need and as a complementary use within, or close to, an identified Local Centre. Facilities that are proposed in isolated locations or that conflict with existing uses nearby will not be permitted.</p> <p>The loss of existing community and cultural venues will only be permitted where it can be demonstrated that:</p> <ol style="list-style-type: none"> The facility is no longer needed and there is no need for an alternative community or cultural use on that site; or The community or cultural uses can be reprovided of a higher quality in an alternative location or manner that is equally accessible to the community. <u>In accordance with Appendix F, the property has been vacant for at least 12 months and there is clear marketing evidence to show it cannot be reused or redeveloped for community uses.</u> 	<ul style="list-style-type: none"> ● Effective ○ Officer change 	N

Development requirements and considerations

The site is considered suitable for the provision of Gypsy and Traveller pitches.

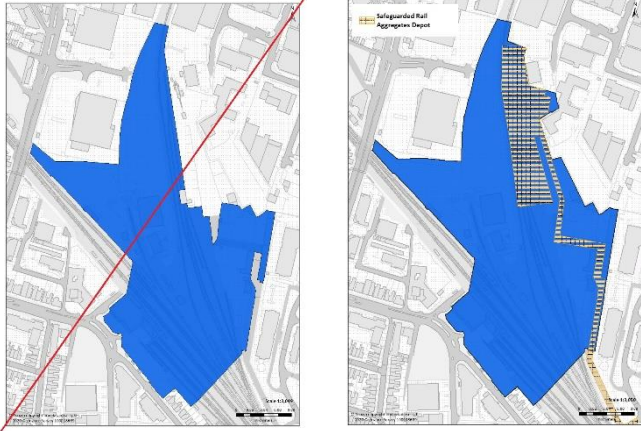

Development proposals should:

- Have regard to criteria a-f of Policy H03.8: Gypsies and Travellers.
- Ensure that the plots are protected for Gypsy and Traveller use exclusively unless it can be demonstrated to be required in accordance with Policy H03.8.
- Retain and enhance the walking and cycle route immediately adjacent to the eastern boundary of the site.
- Provide quality landscaping along the frontage with Tolpits Lane and the path along the eastern boundary.
- Be accompanied by a Preliminary Ecological Assessment
- Incorporate compensatory measures for the loss of Green Belt into the scheme.

M255	Specialist Care and Supported Living Accommodation	<p><u>This includes the following forms of housing:</u></p> <ul style="list-style-type: none"> • <u>Age-restricted general market housing: This type of housing is generally for people aged 55 and over and the active elderly. It may include some shared amenities such as communal gardens, but does not include support or care services.</u> • <u>Retirement living or sheltered housing: This usually consists of purpose-built flats or bungalows with limited communal facilities such as a lounge, laundry room and guest room. It does not generally provide care services, but provides some support to enable residents to live independently. This can include 24 hour on-site assistance (alarm) and a warden or house manager.</u> 				<ul style="list-style-type: none"> • Consistent with national policy ○ Officer change 		N

		<ul style="list-style-type: none"> • Extra care housing or housing-with-care: This usually consists of purpose-built or adapted flats or bungalows with a medium to high level of care available if required, through an onsite care agency registered through the Care Quality Commission (CQC). Residents are able to live independently with 24 hour access to support services and staff, and meals are also available. <p>There are often extensive communal areas, such as space to socialise or a wellbeing centre. In some cases, these developments are known as retirement communities or villages - the intention is for residents to benefit from varying levels of care as time progresses.</p> <ul style="list-style-type: none"> • Residential care homes and nursing homes: These have individual rooms within a residential building and provide a high level of care meeting all activities of daily living. They do not usually include support services for independent living. This type of housing can also include dementia care homes. 		
M256	Town Centre Uses	<p>Town Centre Uses: Defined by the National Planning Policy Framework as retail development (including warehouse clubs and factory outlet centres); leisure, entertainment and more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, nightclubs, casinos, health and fitness centres, indoor bowling centres and bingo halls); offices; and arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference facilities).</p> <p>Main town centre uses: Retail development (including warehouse clubs and factory outlet centres); leisure, entertainment and more intensive sport and recreation uses (including cinemas, restaurants, drive-through restaurants, bars and pubs, nightclubs, casinos, health and fitness centres, indoor bowling centres and bingo halls); offices; and arts, culture and tourism development (including theatres, museums, galleries and concert halls, hotels and conference facilities).</p>	<ul style="list-style-type: none"> • Consistent with national policy <ul style="list-style-type: none"> ○ Officer change 	N

Dear Vicky Pearson,

Watford Borough Council Local Plan Proposed Submission Habitat Regulations Assessment Report

Thank you for your consultation on the above dated the 18th of May 2021 which was received by email on the same date.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Habitat Regulations Assessment

Natural England welcomes the consideration given to the Habitats Regulations. We are satisfied that a conclusion by the Local Planning Authority (as competent authority) that there will be no adverse effects on European sites would be appropriate, and therefore advise that **further Habitats Regulations Assessment is not required.**

For any queries relating to the specific advice in this letter only please contact Jamie Melvin on 020 802 61025. For any new consultations, or to provide further information on this consultation please send your correspondences to consultations@naturalengland.org.uk.

Yours sincerely,

Mr Jamie Melvin
Planning Lead Adviser – West Anglia Team
